(54) Title: IDENTIFICATION AND VALIDATION OF NOVEL TARGETS FOR AGROCHEMICALS

(57) Abstract: The invention relates to a method for identifying and validating plant targets for agrochemicals, comprising the steps of determining gene or protein expression profiles in function of the progression of an essential biological process in a plant, and the subsequent downregulation of expression of said gene or protein in a plant cell. More particularly, the effects of downregulation of the candidate target gene were directly monitored on plants locally infected with a vector mediating viral induced gene suppression in that infected plant area. The invention also relates to isolated plant genes encoding proteins involved in plant growth and development. The invention also relates to plants tolerant to agrochemicals such as herbicides or pesticides.

Form PCT/ISA/210 (continuation of second sheet) (July 1992)

| Box I      | Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)  |
|------------|--|
| This Inte  | ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:   |
| 1.         | Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:  |
| 2.         | Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:         |
| 3.         | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).   |
| Box II     | Observations where unity of invention is lacking (Continuation of item 2 of first sheet)   |
| This Inter | rnational Searching Authority found multiple inventions in this international application, as follows:   |
|            | see additional sheet   |
| 1.         | As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.   |
| 2.         | As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.   |
| 3.         | As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:                               |
| . [        | No required additional accept face were timply paid by the applicant. Consequently, this International Search Report is  |
| 4. [X]     | No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  See Invention 1. |
| Remark o   | The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.   |

Form PCT/ISA/210 (continuation of first sheet (1)) (July 1998)

#### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

Invention 1: claims 1 to 8

a method for identifying and validating plant targets for agrochemicals

Inventions 2 to 786: claims 9 to 16 (all partially)

each invention comprises the use of one nucleic acid selected from the group of SEQ ID NO: 1-785 as a target for a herbicide or pesticide, a method of screening candidate agrochemical compounds using said nucleic acid, the use of said nucleic acid to produce agrochemical resistant plants,

the corresponding isolated nucleic acid

comparison on patent family members
